Profile

At my current role, I focus on converting UI designs into fully functional, responsive WordPress themes. I handle the full process — from translating Figma or custom designs into clean frontend code, to building dynamic, user-friendly WordPress themes. I also carefully select and integrate suitable plugins to add the right features while keeping performance and stability in mind. My work aims to deliver reliable, visually consistent websites that meet both design expectations and technical best

Professional Experience

08/2024 – present
Shubra El Kheima,
Egypt

Frontend Developer | WordPress Developer

In my current role, I specialize in converting static UI designs into fully functional, responsive, and production-ready WordPress themes. I manage the entire development workflow — from translating Figma, Sketch, or custom design files into semantic, maintainable frontend code (HTML, CSS, Tailwind, JavaScript) to developing custom, modular WordPress themes that adhere to best coding practices. I implement dynamic content structures using the WordPress Block Editor (Gutenberg) and ensure seamless integration of carefully selected plugins to extend functionality without compromising performance, security, or scalability. My focus is on delivering optimized, cross-browser compatible websites that are visually consistent, accessible, and technically robust.

Education

Benha University – Faculty of Commerce

Bachelor of Business Administration (Arabic Section) Expected Graduation: 2026 Currently in 4th Year
